Question 3 of 15

Question: Which of these are properties associated with a state transition table?

Result: Correct. Great job!

- [ ] Contains only valid transitions
- [ ] Coverage typically expressed as Pass or Fail
- [x] Contains valid and invalid transitions
  ✓ *Correct answer.*
- [x] Contains events initiating a transition
  ✓ *Correct answer.*

Question: Given this code, which test sets result in 100% statement coverage?

Code Editor:

```
read x
read y
z = x - (5 * y)
if z < 0 then
  print "z negative"
endif
```

Result: Partially correct. The correct answers are indicated.

- [ ] x = 10, y = 5
  ✓ *Correct answer.*
- [ ] x = 5, y = 2
  ✓ *Correct answer.*
- [ ] x = 25, y = 5
- [ ] x = 15, y = 3

Question 7 of 15

Question: Which of these statements accurately describe statement and decision coverage?

Result: Incorrect. The correct answer is indicated.

- [ ] 100% decision coverage guarantees that all executable statements tested
  ✓ *Correct answer.*
- [ ] Statement coverage may provide more coverage than decision coverage
  Incorrect answer.
- [ ] Statement coverage may provide less coverage than decision coverage
  ✓ *Correct answer.*
- [ ] Decision coverage must include True outcomes but not necessarily False outcomes
  Incorrect answer.
